\*COVERAGES GIVEN IN THE CHART ARE ESTIMATED  
 \*ACTUAL COVERAGE MAY VARY DEPENDS ON JOB CONDITION & WASTAGE

Calculation :  

$$\frac{(A+B) \times C \times D \times 0.15}{(A \times B)}$$
 = Sq. Ft.  
 Kg.

Where:  
 A = Length of Tiles  
 B = Width of Tiles  
 C = Height of Tiles  
 D = Groove

- Grout shades are approximate guides only.
- Verify actual appearance and compatibility with a test area before installation commences.
- Actual shades and texture will depend on jobsite condition.
- There may be a shade variation in different batches. It is advice to mix grout from different batches to get uniform color.
- Quantities shown are approximate and are given for estimating purpose only.
- Actual job site coverage's may vary.
- It is always good practice when calculating coverage to allow for 10 to 15 % additional material for wastage and spillage.

Packing  
 1 Kg and 5 Kg

Mfg. By:  
**Arrotile Constrachem**  
 U-1 : Khambha, Rajkot - 360 311, (GUJ.) India.
